noctisight™

Transforming the Market with Breakthough Technology

Images taken at the same time, date, and location, featuring a parking lot with the light posts turned off.

Naked Eye

From a balcony perspective, a dimly lit figure is barely visible in the parking lot, using a cell phone light. The individual's features and movements remain indistinct.

Security Camera

Through the security camera, the same scene appears with the person and their cell phone light. However, the camera fails to clarify the presence or activities of the individual.

NoctiSight™

NoctiSight technology dramatically enhances visibility: the person and their surroundings are illuminated clearly, resembling daylight conditions. The scene becomes vividly discernible.

What is NoctiSight?

This is more than just a product; it's a revolution in surveillance technology.

At CSCI, we've pioneered NoctiSight, a groundbreaking market disruptive technology set to transform the landscape of industry dynamics and security.

AI-enabled software compatible with any commercial camera.

Redefines the capabilities of both human and machine observation.

Maintains consistent color views in any lighting or weather condition.

Designed to deliver vibrant, real-time nighttime video, it stands apart from the industry norm, which often relies on time-consuming post-processing for color night vision.

Scales with evolving camera technology, ensuring a versatile security solution.

Detects, Tracks, and Alerts with 95% Accuracy.

CSCi

CSCI's latest innovation isn't just a step forward in technology; it's a leap into the future of security and surveillance. NoctiSight redfines what's possible in monitoring and safety.

Step into the future with us, where night turns into day, and clarity is just a camera away.

noctisight™

NoctiSight transforms corporate security.

Our AI-enabled surveillance software is a game-changer in industry dynamics. Compatible with any commercial camera, NoctiSight offers unprecedented real-time, color-accurate nighttime vision without the need for post-processing. Our technology redefines observation capabilities with 95% accuracy in detection, tracking, and alerting, ensuring consistent performance in any lighting or weather condition.

Experience the revolution in surveillance that not only solves your security challenges but sets a new standard in safety and efficiency.

Adaptable Scaling for Future-Proof Surveillance

NoctiSight stands at the forefront of adaptability in surveillance technology. Its scaling capabilities are impressively adaptable, seamlessly expanding alongside the evolving advancements in camera technology. This ensures that as camera capabilities grow, so does the potential of NoctiSight, offering you a future-proof solution for your security needs.

Ultra-Fast, Real-Time Color Processing

Experience the pinnacle of efficiency with NoctiSight's groundbreaking feature of real-time color processing in under 50 milliseconds. This ultra-fast response time ensures you get accurate, real-time, instantaneous visuals, making certain that no critical detail goes unnoticed.
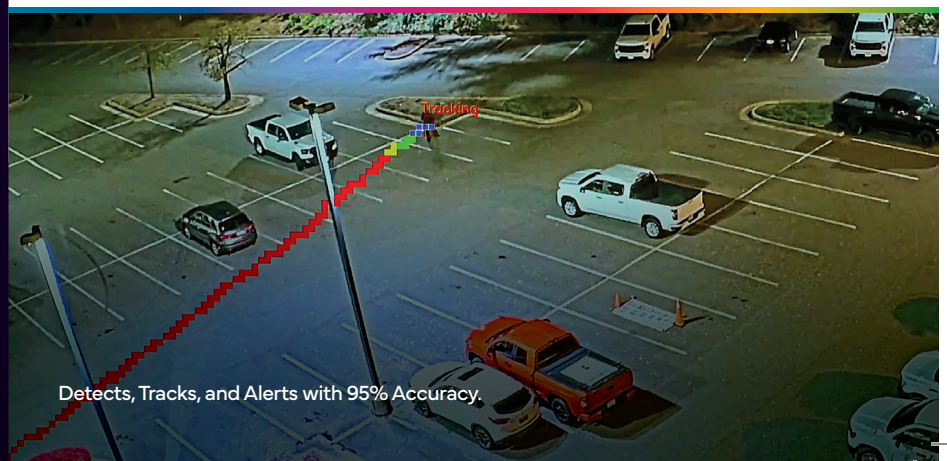

Day and Night Vision Parity

With NoctiSight, the distance your camera reaches during the day is now achievable at night. Our technology bridges the gap between day and night surveillance, providing unparalleled clarity and range, regardless of the time.

Precision with 95% Accuracy

Our technology boasts a remarkable 95% accuracy rate in detecting, tracking, and alerting. This level of precision ensures that you are always one step ahead, making informed decisions based on reliable data.

Customized Solutions for Every Need

We understand that one size doesn't fit all. That's why NoctiSight offers customizable packages tailored to meet your specific surveillance needs. Whether it's for a small business or a large enterprise, our team is dedicated to crafting a solution that aligns perfectly with your security requirements.

Detects, Tracks, and Alerts with 95% Accuracy.
